

Osprey COI RiskManager™

Achieve 100% COI Disclosure Compliance,
Reduce Risk and Costs

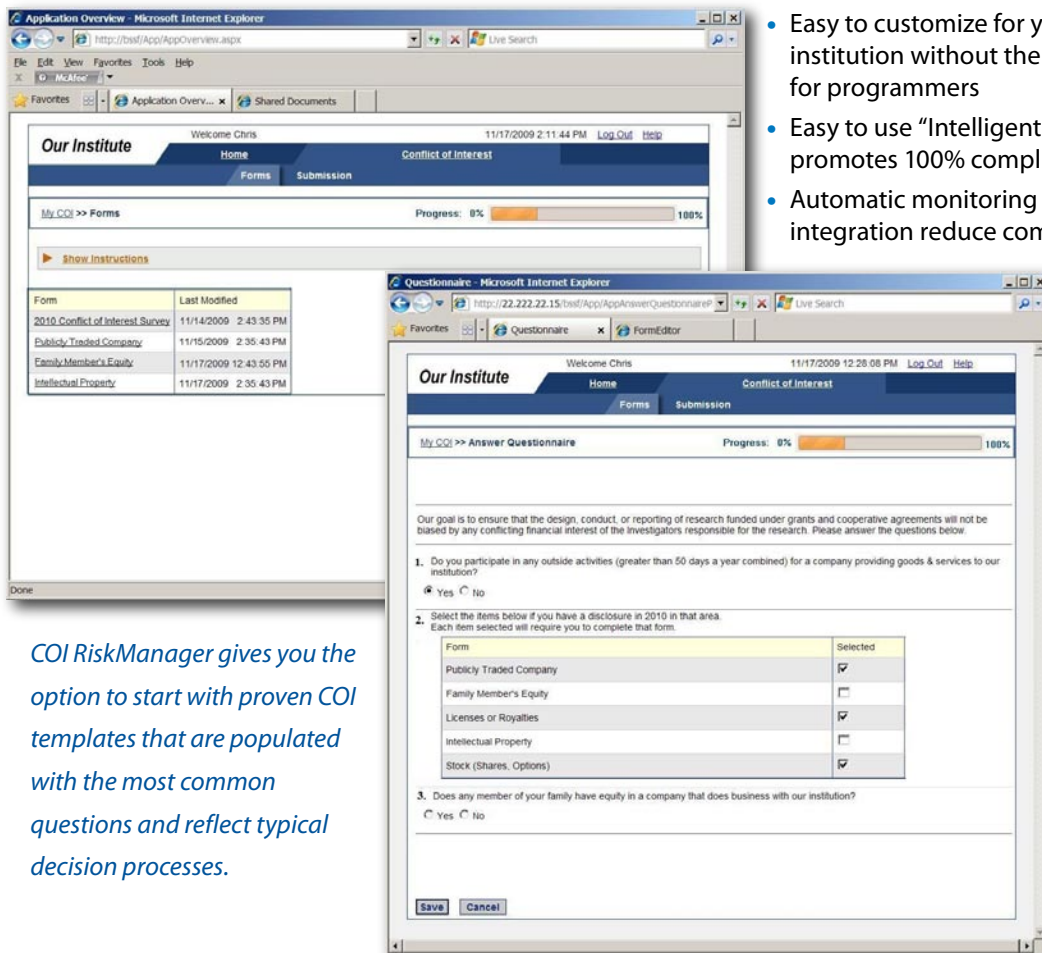

How Does It Work? 100% Compliance:

Osprey COI RiskManager™ is specifically designed for managing Conflict of Interest compliance in medical research. At its heart is a web-based workflow framework providing interactive Forms and Questionnaires that can be fitted to your own COI process without programmers by snapping your questions into custom workflows.

COI RiskManager makes it easy for researchers to comply because the disclosure automatically adjusts itself, in real-time, based upon the responses. COI RiskManager automatically prompts for follow-up, and alerts researchers and oversight managers as necessary.

Protect Your Institution's Research Integrity and Reputation – While Reducing Costs

- Proven technology built for and used by world class research institutions
- Fully automate your compliance process with a “paper-free” web based solution
- Easy to customize for your institution without the need for programmers
- Easy to use “Intelligent Disclosures” promotes 100% compliance
- Automatic monitoring and enterprise integration reduce compliance costs

COI RiskManager gives you the option to start with proven COI templates that are populated with the most common questions and reflect typical decision processes.

Osprey COI RiskManager™

Special Productivity Features

- Data carries over from previous disclosures
- Add your distinctive look and feel
- Interfaces with your HR and email system
- Real time, field level, data validation
- All disclosures results are searchable

OSPREY 
SOFTWARE SOLUTIONS INC.
Great Minds Build Great Solutions

Proven Technology

- WEB based – works with any browser
- Secure – all user sessions are encrypted
- Scalable – 100 or 100,000+ disclosers
- Validated by world class research institutions

Design and Support Your Own COI Process

- Start with proven templates reflecting commonly used COI questions and decision processes.
- Customize the system by easily integrating your own forms and workflow approval processes using Osprey's Forms Wizard™.
- Set alerts and thresholds that signal when special disclosures, individual reviews, and further questions may be necessary.
- Automatically import project team information and sponsor information from your clinical trials management system.
- Automatically email disclosure requests to individual reporting parties via links imbedded in the secure online disclosure.

Identify and Eliminate COI Exposure

- Osprey's Intelli-Disclosure™ engine analyzes responses in real-time and automatically adjusts the sequence of questions.
- Disclosures are electronically recorded and flagged when alert thresholds are reached. Deep drill disclosures are automatic.
- Compliance management and research departments get instant visibility into all potential conflicts of interest.
- Automatic reporting, with special audit views, provides visibility and transparency for Accreditations and Government Auditors.
- Reminders for researchers and administrators are automatically generated and follow through is automatically tracked.
