

Sr. Software Engineer – Microsoft .NET / C#

Mission critical enterprise application design & delivery is what we do. Osprey Software & Systems is a leading software application development firm that specializes in the architectural design and delivery of complex business solutions.

We focus on insuring that our client's mission critical business applications result in a substantive business outcome. We combine a powerful blend of architectural expertise, business knowledge and proved technology expertise with an effective partnership process.

We have a great opportunity for a full-time (will consider consultant) Sr. Software Engineer to work with one of our premier clients in the Boston area!

In this role, you will be responsible for designing, developing and implementing programs, as required, to support our technical capabilities.

SPECIFIC RESPONSIBILITIES:

- Develop new or maintain existing programs based on clients' specifications.
- Develop, implement and maintain unit tests of programs.
- Participate in requirements gathering and definition.
- Lead the design of new or changing programs and producing requisite specifications.
- Participate in functional test planning and testing for the assigned application(s), functional area(s) or project(s)
- Participate in problem solving and troubleshooting for the assigned application(s), functional area(s) or project(s)
- Share knowledge by effectively documenting work
- Maintain expert level of knowledge in area of expertise
- Develop and maintain a thorough knowledge of the assigned application(s), functional area(s) or project(s)
- Work with the team to ensure the quality of coordinated business functions.
- Respond quickly and effectively to production issues and take responsibility for seeing those issues through resolution.
- Participate in project planning & life cycle management.
- Participate in design and maintenance of enterprise architecture

REQUIRED QUALIFICATIONS and SKILLS:

- Demonstrated expertise in MS .NET 2.0; ASP.NET ; C# Code behind; SQL Server 2005; UML.
- Strong analytical and problem-solving skills.
- Good knowledge of and experience with user interface design patterns, visual design elements, web technologies, UML and development methodologies.
- Possess basic project management skills to track all project work.
- More than 4 years experience in relevant technologies
- College degree or equivalent work experience.
- Ability to work on multiple projects and be flexible to adapt to any given situation.
- Ability to effectively communicate verbally and in writing to all levels of the organization
- Exceptional customer service attitude and interpersonal skills.

We offer an excellent compensation and benefits package and an opportunity to learn, grow and contribute in a stimulating, fast-paced environment where individual contributions are recognized and rewarded. For immediate consideration, send resume with salary requirements to jobs@ospreyss.com. EOE
