

UML Business Analyst

Mission critical enterprise application design & delivery is what we do. Osprey Software & Systems is a leading software application development firm that specializes in the architectural design and delivery of complex business solutions.

We focus on insuring that our client's mission critical business applications result in a substantive business outcome. We combine a powerful blend of architectural expertise, business knowledge and proved technology expertise with an effective partnership process.

We have a great opportunity for a full-time (will consider consultant) UML Business Analyst to work with one of our premier clients in the Boston area! In this role, the UML Business Analyst will be responsible for defining business requirements, in UML, and bridge the gap between business experts and developer experts. You will be responsible for gathering requirements, creating workflow documentation, performing testing and facilitating release efforts, while working within the framework of the UML software development life cycle.

Specific Responsibilities:

- Work with internal users and development team members to model and document business process flows and data requirements in UML.
- Facilitate meetings to gather business requirements and translate them into functional specifications.
- Work with software developers and other technical staff to document and test various internet based enterprise business applications.
- Develop and execute testing and quality control procedures.
- Support project tracking and monitoring.

Required Qualification and Skills:

- • Expertise in UML.
- • Background in logistics and asset management is a plus.
- • College degree or equivalent work experience.
- • More than 4 years experience in relevant roles
- • Knowledge of software development or system implementation life cycle
- • Knowledge of database, system design, and technical architecture concepts
- • Internet enterprise applications, developed in Microsoft .NET, is a plus.
- • Demonstrated experience with writing functional specifications
- • Demonstrated experience with writing test plan/test scripts
- • Proven success as a liaison between the technical and business teams
- • Ability to work on multiple projects and be flexible to adapt to any given situation.
- • Possess basic project management skills to track all project work.
- • Ability to effectively communicate verbally and in writing to all levels of the organization
- • Exceptional customer service attitude and interpersonal skills.
- • Strong analytical and problem-solving skills.

We offer an excellent compensation and benefits package and an opportunity to learn, grow and contribute in a stimulating, fast-paced environment where individual contributions are recognized and rewarded. For immediate consideration, send resume with salary requirements to jobs@ospreyss.com. EOE
