

## Software Development Project Manager

Osprey Software Solutions, Inc. is a leading software application development firm that specializes in the architectural design and delivery of complex business solutions.

We focus on insuring that our client's mission critical business applications result in a substantive business outcome. We combine a powerful blend of architectural expertise, business knowledge and proved technology expertise with an effective partnership process.

### Position Summary

We have a great opportunity for a full-time (will consider consultant) Software Development Project Manager to work with one of our premier clients in the Boston area!

In this position the selected candidate will be responsible for managing the project, process, and assigned team to develop and deliver applications and services. This involves frequent and direct communication with the client, developing scope and cost estimates, resolving impediments for the team efficiently, and supporting the implementations of solutions through the entire project.

### SPECIFIC RESPONSIBILITIES:

- Create and manage the scope, cost, schedule and deliverables through the application of planning tracking, quality assurance, change control and risk management.
- Lead project team of engineers through all phases of the application development cycle
- Work with client to understand their business activities, workflows, and needs, determine requirements gathering and analysis, design, build, test and deployment.
- Facilitate the project team, scrums, release planning, product grooming meetings.
- Monitor and manage project performance including deliverables, milestones and expenditures.
- Manage client relationships and expectations..

### REQUIRED QUALIFICATIONS and SKILLS:

- Minimum of 4 years leadership experience required including managing software development teams, including inspiring the development of team members, identifying opportunities for improvement and managing innovative change effectively
- Familiarity with project management tools, such as Microsoft Project, Excel, PowerPoint, etc...
- Familiar with programming languages and operating systems, including C, C++, Linux, etc...
- Experience at working both independently and in a team-oriented, collaborative environment is essential
- Flexible during times of change, can conform to shifting priorities, demands and timelines through analytical and problem-solving capabilities
- Ability to effectively prioritize and execute tasks in a high-pressure environment and manage multiple projects simultaneously.
- Effectively conveys message in both written and verbal communication with excellent interpersonal skills

We offer an excellent compensation and benefits package and an opportunity to learn, grow and contribute in a stimulating, fast-paced environment where individual contributions are recognized and rewarded.
